prious Disregard of Cleanliness by Owners of Dairies Charged by Expert

IMPLEST SANITARY METHODS ARE IGNORED

the last meeting of the board of culture and forestry, Dr. Victor A. card made a progress report on the crisi count in milk samples collectron local dairies. These indicate cidedly serious disregard of cleans on the part of many owners of heartle.

"I trust that the completion of the new air line to Hawaii will bring the news and interests of the Islands closer to the minds and hearts of your main land countrymen."

By Hiram W. Johnson, Governor of California

"Sacramento,

"September 24, 1914.

"Hon, L. E. Pinkham, Governor of Hawaii, Honolulu: At the last meeting of the board of gaard made a progress report on the cterial count in milk samples collect-from local dairies. These indicate decidedly serious disregard of clean es on the part of many owners of

The inberculin test was given to 22: firy cows during August without one that "'a large percentage of the cal dairies are disregarding even the suplest sanitary methods for the projection of clean wilk, and it is there it not surprising that those dairies such have not yet succeeded in stamp g out bovine tuberculosis, after four are efforts, now find the discuse on a ingrass."

Ment Is Awakening

Moul Is Awakening
With reference to dairy conditions
Mani, Doctor Norgaard says:

'In repard to the extension of the
vine tuberculosis control work to the
ser Islands, I am pleased to state
it during a recent visit to Mani I
and the public disposition in regard
well agreatly improved, many mile
chilerer baving read with interest the
blisbed accounts of what has been
comprished on Oahu, and signifying
ir willingness to have their herdted and to eliminate all diseased
imals.

The Mani deputy territorial veter rises has therefore been supplied in 2000 donce of tuberculin and the me number of aluminum car tags, d will now pursue this work as fast his time and opportunities will also bim. In the meantime 10,000 accordingly done of tuberculin have been unsittened from the federal phone. tional doses of tuberculin have been quisitioued from the federal laboration in Washington, and while notice is been received of the shipment of the same it has not yet arrived but ill, npan receipt, he distributed in lequate quantities to the deputies on await and Kanai so that any mill reducer in the Territory who so decrease an have his hord tested and join to ranks of those who are helping to be human lives by furbishing non-institute milk for the infants and chilen of these Islands."

Hawait Beats World

Hawaii Beats World Other features of the report were

A letter from the chief of the United States bureau of animal industry, certaining to the bovine tuberculosis lication work in the District of Co bis has been received which com-tic spon our work and methods. Though the federal authorities in their unlimited means and facil have been engaged at this worl a slightly longer period than we though they are paying an indem of mearly seventy five per cent of appraised value of all reactors de troyed, they have not yet succeeded in completely cradicating the disease completely eradicating the disease; their last official record being 1.83 per cent of tuberculosis cattle for the year ending June 30, 1913."
"During the latter part of August

what threatened to be a sovere out break of a parasitical disease of horse-an reported from Mani and the r, pursuant to the board's innctions, proceeded to that Island or iguat 31, Upon arrival it was found at aix animals had died on one plantion while one which was found in a ring condition was destroyed for out-mortem examination. The result the latter was, as usual, negative so far as actual pathological changes are concorned, except for the presof a number of aneuriams on the inal arteries in which were found bodied the embryos of the 'armed'

"The mature worm was also found in large numbers in the colon and comm, but no trace of embryos or infarets caused by these could be found in the bruin. These intestinal and blood parasites play, in the writer's sinion, an important role as a direct, at least a contributing cause to the spearance of that greatly varying ad complex series of symptoms in es and mules which is most freently referred to as cerebro-spinal eningitis, though admittedly a mis-

Pure Water a Remedy

"As a part of the life cycle of this arasite is speat in stagmant water my forts to prevent the repeated out-ranks of this disease have been prin-ipally directed toward the purificacipally directed toward the purificawhere the disease occurs regularly, and in a number of cases apparent success in suppressing the disease has resulted.

"The first rule is therefore to keep all horse stock away from stagnant water and especially to drain all water

(From Saturday Advertiser.)

A most interesting, highly exciting and well conducted affair was the onsensus of opinion at the conclusion of the big tug-of-war tournament at the National Guard Armory last night under the auspices of the entertaining ommittee of the National Guard of

Hawaii.

Following the program of the previous evenings, eight willing and aggressive teams of tug of warsmen y climbed upon the cleats during the evening and gave the crowd, of which there were fully 2000 people present, a night of highly interesting aport.

First to face the fans were the First Infantry, N. U. H. team and the second team of the Twenty-fifth Infantry team from Schofield Barracks. Without unnecessary delay, Captain Stayton pulled the trigger of Colonel Johnson's army revolver and after four minutes and twenty seconds of aip and tack tugging, the men from Schofield were forced to lower their colors to the National Guardamen.

stables and yards where the water sup-ply can be absolutely controlled much can be accomplished by filtering the water as it comes from the pipes or by sand filters placed on open flumes. Medical treatment is of no use as the embryos in the blood vessels cannot be reached by any form of medication.

Through the generosity of the en-tertainment committee these two teams were enabled to pull for an added prize of thirty dollars and the bounts will worth the cost.

Ten minutes following this bout, the team from the U. S. S. Navajo an ion along the lines above indicated.

"It is, however, encouraging to note that even though it continued to rain nearly every day during the two weeks I remained on Maul only one additional case came under observation which act would seem to indicate a decided ging and pulling for thirty-four minseconds before a winner was declared. This honor fell to the National Guardsmen.

Alert's Men Score As an added attraction to the program, the entertainment committee hung up a special prize of fifteen do larg for the two teams of the tourne which had lost both their previous matches. The Alexander of the tourne which had lost both their previous matches. matches, the Alerts and Second Infa

This was an easy thing for the sailormen, the soldiers being completely routed in exactly one minute. Closing the program came the match-for first and second prizes, the former being \$150 in cash and the latter \$75 in cash, the contesting teams being the

first team from the Twenty-fifth In-fantry and the Pacifics. The latter ag-gregation studied their opponents for fully a minute and a half and then at signal from their captain began pulling the Infantry away from their pothe Pacifics in two minutes and fortyfive seconds
